

Part 1

For questions **1 – 8**, read the text below and decide which answer (**A**, **B**, **C** or **D**) best fits each gap. There is an example at the beginning (**0**).

Mark your answers **on the separate answer sheet**.

Example:

0 **A** deposits **B** piles **C** stores **D** stocks

0	A	B	C	D

New uses for salt mines

Geological **(0)** of salt were formed millions of years ago, when what is now land, lay under the sea. It is hard to believe that salt is now such a cheap **(1)** , because centuries ago it was the commercial **(2)** of today's oil. The men who mined salt became wealthy and, although the work was **(3)** and frequently dangerous, a job in a salt mine was highly **(4)**

Nowadays, the specific microclimates in disused mines have been **(5)** for the treatment of respiratory illnesses such as asthma, and the silent, dark surroundings in a mine are considered **(6)**.....in encouraging patients to relax.

In addition, some disused mines have been **(7)** to different commercial enterprises, although keeping up-to-date with the technology of mining is essential to **(8)** visitors' safety. Some of the largest underground chambers even host concerts, conferences and business meetings.

1	A provision	B utility	C material	D commodity
2	A match	B similarity	C parallel	D equivalent
3	A critical	B demanding	C extreme	D straining
4	A regarded	B admired	C approved	D honoured
5	A exploited	B extracted	C exposed	D extended
6	A profitable	B agreeable	C beneficial	D popular
7	A put down	B turned over	C made out	D set about
8	A enable	B retain	C ensure	D support

Part 2

For questions **9 – 16**, read the text below and think of the word which best fits each gap. Use only **one** word in each gap. There is an example at the beginning **(0)**.

Write your answers **IN CAPITAL LETTERS** on the separate answer sheet.

Example:

0	T	O															
---	---	---	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

Managing change

Most people find change unsettling and difficult to adapt **(0)**..... Many societies have experienced **(9)** rapid change in the early years of the 21st century that life can feel very daunting **(10)** times. Various commentators have **(11)** forward suggestions for coping with change on a personal level.

One suggestion involves thinking of three solutions to a problem, rather **(12)** two. Apparently, many people faced **(13)** change respond by considering two possible courses of action, but invariably tend to reject both of these. However, thinking instead of three potential solutions is a strategy which, according to research, provides a reliable way of finding a solution to the initial problem.

Another strategy advocates learning to avoid set patterns of routine behaviour. Something simple, **(14)** taking another route to work at **(15)** once a week, is seen as encouraging confidence in the face of uncertainty. **(16)** the simplicity of these ideas, they nevertheless help prepare people mentally to manage major change if necessary.

Part 3

For questions **17 – 24**, read the text below. Use the word given in capitals at the end of some of the lines to form a word that fits in the gap **in the same line**. There is an example at the beginning **(0)**.

Write your answers **IN CAPITAL LETTERS** on the **separate answer sheet**.

Example:

0	D	I	S	S	I	M	I	L	A	R								
---	---	---	---	---	---	---	---	---	---	---	--	--	--	--	--	--	--	--

Fashion and Science

At first glance science and fashion could not be more (0) Science is generally considered to be a (17) that is slow-paced, serious and worthy, whereas fashion is frivolous, impulsive and often (18)	SIMILAR PURSUE PREDICT
But fashion owes more to science than some (19) might like to admit. Fashion houses adopt new materials in order to (20) themselves from their various (21)One designer recently showed off a liquid that can be used to produce clothes that are seamless.	ENTHUSE DISTINCT COMPETE
As cotton is (22) having to compete with other crops for land, and oil-based fabrics become less acceptable, scientists are working to develop (23)for these products. Sportswear, for example, has been transformed thanks to the use of (24) materials and scientific designs, greatly improving the performance of athletes.	INCREASE REPLACE INNOVATE

Part 4

For questions **25 – 30**, complete the second sentence so that it has a similar meaning to the first sentence, using the word given. **Do not change the word given.** You must use between **three** and **six** words, including the word given. Here is an example (**0**).

Example:

0 James would only speak to the head of department alone.

ON

Jamesto the head of department alone.

The gap can be filled with the words 'insisted on speaking', so you write:

Example:

0

INSISTED ON SPEAKING

Write **only** the missing words **IN CAPITAL LETTERS** on the separate answer sheet.

25 As long as you explain the process clearly at the conference, your boss will be pleased.

GIVE

If the process at the conference, your boss will be pleased.

26 They say that a visitor to the national art gallery damaged an 18th-century painting.

ALLEGED

A visitor to the national art gallery..... an 18th-century painting.

27 I really don't mind whether Jill chooses to come on holiday with us or not.

DIFFERENCE

It reallywhether Jill chooses to come on holiday with us or not.

28 Without the help that Joe gave me, I don't think I'd have finished the course.

BEEN

If it help, I don't think I'd have finished the course.

29 We can assure our customers that we will take every possible measure to maintain the quality of the products on our shelves.

TAKES

We can assure our customers that we will..... to maintain the quality of the products on our shelves.

30 Following some complaints by local residents, the government withdrew its proposal to build a new runway at the airport.

LIGHT

The government's proposal to build a new runway at the airport
some complaints by local residents.

Part 5

You are going to read a review of two books about the internet. For questions **31 – 36**, choose the answer (**A, B, C or D**) which you think fits best according to the text.

Mark your answers **on the separate answer sheet**.

The internet today

James Baxter reviews two books about the internet: *Rewire* by Ethan Zuckerman, and *Untangling the Web* by Aleks Krotoski.

Open a street map of any city and you see a diagram of all the possible routes one could take in traversing or exploring it. Superimpose on the street map the actual traffic flows that are observed and you see quite a different city: one of flows. The flows show how people actually travel in the city, as distinct from how they could. This helps in thinking about the internet and digital technology generally. In itself, the technology has vast possibilities, as several recent books emphasise, but what we actually wind up doing with it is, at any point in time, largely unknown.

Ethan Zuckerman is excited by the possibilities the web provides for linking far-flung populations, for sampling different ways of life, for making us all digital cosmopolitans. His central thesis, however, is that while the internet does, in principle, enable everyone to become genuinely cosmopolitan, in practice it does nothing of the kind. As the philosopher Anthony Appiah puts it, true cosmopolitanism ‘challenges us to embrace what is rich, productive and creative’ about differences; in other words, to go beyond merely being tolerant of those who are different. Much of the early part of *Rewire* is taken up with demonstrating the extent to which the internet, and our use of it, fails that test.

line 13

‘We shape our tools,’ said the philosopher Marshall McLuhan, ‘and afterwards they shape us.’ This adage is corroborated every time most of us go online. We’ve built information tools (like search and social networking systems) that embody our biases towards things that affect those who are closest to us. They give us the information we think we want, but not necessarily the information we might need.

Despite all the connectivity, we are probably as ignorant about other societies as we were when television and newspapers were our main information sources. In fact, Zuckerman argues, in some ways we were better then, because serious mainstream media outlets saw it as their professional duty to ‘curate’ the flow of news; there were editorial gatekeepers who determined a ‘news agenda’ of what was and wasn’t important. But, as the internet went mainstream, we switched from curation to search, and the traditional gatekeepers became less powerful. In some respects, this was good because it weakened large multimedia conglomerates, but it had the unanticipated consequence of increasing the power of digital search tools – and, indirectly, the power of the corporations providing them.

Zuckerman – a true cosmopolitan who co-founded a web service dedicated to realising the net’s capacity to enable anyone’s voice to be heard – provides an instructive contrast to excessively optimistic narratives about the transformative power of networked technology, and a powerful diagnosis of what’s wrong. Where he runs out of steam somewhat is in contemplating possible solutions, of which he identifies three: ‘transparent translation’ – simply automated, accurate translation between all languages; ‘bridge figures’ – bloggers who explain ideas from one culture to another; and ‘engineered serendipity’ – basically, technology for enabling us to escape from filters that limit search and networking systems. Eventually, the technology will deliver transparent translation; cloning Ethan Zuckerman would provide a supply of bridge figures, but, for now, we will have to make do with pale imitations. Engineering serendipity, however, is a tougher proposition.

Aleks Krotoski might be able to help. She is a keen observer of our information ecosystem, and has been doing the conference rounds with an intriguing contraption called the ‘Serendipity Engine’, which is two parts art installation and one part teaching tool. *Untangling the Web* is a collection of 17 thoughtful essays on the impact of comprehensive networking on our lives. They cover the spectrum of stuff we need to think about – from the obvious (like privacy, identity and the social impact of the net) to topics which don’t receive enough attention (for example, what medics, with a sniff, call ‘cyberchondria’ – how the net can increase health anxieties).

line 36

line 38

line 40

Although she’s a glamorous media ‘star’ (having fronted a TV series about the internet), people underestimate Krotoski at their peril. She’s a rare combination of academic, geek, reporter and essayist, which her chapter on the concept of friendship online exemplifies: she’s read what the key social theorists say on the subject, but she’s also alert to what she experiences as ‘emotional anaemia’ – ‘the sense that....you might not feel the online love from the people you should, because your nearest and dearest may be drowned out in the ocean of sociability.’ Which, in a way, brings us back to Zuckerman’s thoughts about the difference between what networked technology could do and what it actually does.

- 31 The reviewer starts with the metaphor of a city map in order to illustrate
- A the difficulty in understanding the complexity of the internet.
 - B the degree to which the internet changes as time passes.
 - C the difference between potential and real internet use.
 - D the importance of the internet in people's lives today.
- 32 What do the words 'that test' in line 13 refer to?
- A providing more widespread access to information
 - B connecting in a substantial way with other cultures
 - C establishing principles for developing the internet
 - D accepting that not everyone in the world is the same
- 33 What point is made about the internet in the third paragraph?
- A People often struggle to find what they are looking for on it.
 - B It influences how people relate to family and friends.
 - C All users have some responsibility for its evolution.
 - D The way in which it works is far from neutral.
- 34 What does the reviewer suggest about Zuckerman in the fifth paragraph?
- A His recommendations are less impressive than his analysis.
 - B He uses terms that are harder to understand than need be.
 - C He has the same failings that he identifies in other people.
 - D His account of important developments is too negative.
- 35 Which of the following words is used to suggest disapproval?
- A rounds (line 36)
 - B contraption (line 36)
 - C stuff (line 38)
 - D sniff (line 40)
- 36 What does the reviewer suggest about Aleks Krotoski in the final paragraph?
- A Her insight into the nature of online friendship is perceptive.
 - B She has been influenced by Ethan Zuckerman.
 - C People are often misled by her academic credentials.
 - D She takes on too many different roles.
