WHY I DISLIKE COMPUTERS

- 0 Almost everyone says that computers are wonderful and that they are
 00 changing our own lives for the better by making everything faster and
 41 more reliable, but I'm not so much sure that this is the case.
 42 The other day I was standing in a large department store until
 43 waiting to pay for a couple of films for my camera when the assistant
 44 announced that the computer which controlled the till it had stopped
 45 working. I didn't think this was a big problem and I set myself off to
 46 find another counter, but of course, all the machines are one part of
 47 the same system. So there we were: a shop full of customers, money
 48 at the ready, waiting to make our purchases, but it was quite clear that
 49 none out of the assistants knew what to do. They weren't allowed to
 50 take our money and give to customers a written receipt, because the
 51 sales wouldn't then have been recorded on the computer system.
 52 In the end, like with many other people, I left my shopping on the
 53 counter and walked out. Don't you think so that's ridiculous? It would
 54 never have happened before computers, and that, for me, is all the
 55 problem: we are beginning to depend on these machines for so
 completely that we simply can't manage without them any more.

PART 5

For questions **56–65**, read the text below. Use the word given in capitals at the end of each line to form a word that fits in the space in the same line. There is an example at the beginning **(0)**. Write your word **on the separate answer sheet**.

Example:

CAMERON PARK

At first light, there is nothing **(0)** about the town of Cameron Park in California but, as the day begins and the town comes to **(56)** , you can't help **(57)** that, among the cars, there are light aeroplanes moving along the roads towards the airport.

When the town was **(58)** built, a small airport was included for the **(59)** of people flying in to look at the properties which were for **(60)** , but it soon became clear to the developers that this was an attraction in itself. The streets were **(61)** so that planes could use them, the mailboxes near the road were made **(62)** to avoid passing wings, and all the electricity cables were buried **(63)**

Now, there is every **(64)** that the residents will have a private plane in their garage and use it with the same **(65)** other people enjoy with their cars.
